WORK EXPERIENCE

Junior Cybersecurity Engineer Apr 2026 - Present
HelloConnect Inc. *Manila, Philippines*

- Screened security breach for the Github PR Requests before approving.
- Caters Security issues raised in JIRA for a swift response or a quicker escalation.
- Leveraging Agentic AI for automation of repetitive tasks like PR approval and JIRA Ticketing review.

Cybersecurity Engineering Intern Jan 2026 - Apr 2026
REVLV Solutions Inc. *Manila, Philippines*

- Conducted VAPT for internal and external websites as part of the Software protocols of the company.
- Implemented a honeypot that tracks a commands with a fake SSH to evaluate attackers'pattern
- Managed the Rules for Firewall using FortiGate and developed a dashboard that summarizes the blocked categories.

Data Support Engineer May 2024 - Apr 2026
Simon Data *New York,USA (Remote)*

- Enforcing RBAC ensures users only have the necessary permissions, reducing insider threats
- MFA adds an extra layer of security, mitigating credential theft risks
- Ensuring compliance with these regulations means implementing strong data protection, encryption, and access control mechanisms

Technical Support Engineer Feb 2023 - May 2024
Spreedly *North Carolina, USA (Remote)*

- Adhering to PCI DSS standards ensures safe handling of credit card transactions, reducing fraud risks
- Using SQL queries to investigate incidents helps detect and mitigate threats like data breaches or unauthorized access
- Automating migrations minimizes human errors that could lead to data corruption or security breaches
- Proper system configurations reduce vulnerabilities that attackers could exploit

Junior Software Engineer Aug 2022 - Feb 2023
Volenday *Manila, Philippines*

- Improving website security reduces attack surfaces like XSS (Cross-Site Scripting) and CSRF (Cross-site Request Forgery)
- Secure API integrations protect against data leaks and unauthorized API access
- Security should not hinder usability; optimizing both ensures a secure yet smooth user experience.

EDUCATION

De La Salle University Manila, Philippines
Bachelor of Science in Computer Engineering

- Academic Achievements:
  - AY 2023-2024, Term 1: **1st Honor Dean's Lister**, GPA: 3.538
  - AY 2019-2020, Term 3: **2nd Honor Dean's Lister**, GPA: 3.077
- **CTO**, Google Developer Student Clubs - De La Salle University (2022-2024)
- **Assistant Vice President - Affiliations**, Association of Computer Engineering Students (2024)
- **Executive for Membership**, Engineering College Government (2022-2023)

CERTIFICATIONS

Google Certification October 2023
Cybersecurity Professional *Coursera*

PROJECTS

Cowrie SSH/Telnet Honeypot

- Designed and deployed a medium-interaction Cowrie honeypot to capture attacker activity (credentials, commands, file downloads) and log data to PostgreSQL for threat analysis.
- Patched core PostgreSQL logging bugs and implemented controlled credential access via userdb.txt.

Post-VAPT Automated Detection and Response

- Developed custom Elastic Security detection rules based on critical VAPT findings (e.g., IDOR, mass exfiltration) to automate threat identification.
- Integrated Elastic Agent and Elastic Defend to ingest and analyze high-volume logs (30k+ logs), creating a real-time monitoring and response workflow.

Hybrid Web Attack Detection System

- Built and deployed a hybrid WAF (VAE anomaly detection + signature enforcement + local LLM triage) as an async FastAPI reverse proxy, reaching 0.946 ROC-AUC and 95.9% zero-day XSS recall on CSIC 2010 while blocking live attacks against OWASP Juice Shop in ~0.15 s at a 0.83% false-positive rate.

SKILLS/TOOLS

Programming Languages: TypeScript, JavaScript, Python, Bash, SQL, Java
Networking & Security Tools: Cisco Packet Tracer, Wireshark, GNS3, Nmap, Netcat, OpenSSH, pfSense
Operating Systems: Linux (Ubuntu, Kali, CentOS), Windows (Client & Server), MacOS
Databases: MySQL, PostgreSQL, MongoDB
DevOps Tools: Git, Jenkins, Postman, Airflow
Cloud: AWS (EC2, S3), Azure (Entra ID, Microsoft365)
Monitoring Tools: Zendesk, Jira, Salesforce, Datadog
